<input type="checkbox"/>	Certificate Name	Options
<input type="checkbox"/>	1 huaji.tar	Download Delete

R
O

2.login phone GUI

download the certificate file,and rename the huaji.crt and huaji.key to client.crt and client.key

you can change the client.ovpn file or create as follow contents.

download the demo openvpn,then

client

dev tun

proto udp

remote 117.176.159.163 1194

resolv-retry infinite

nobind

ca ca.crt

cert client.crt

key client.key

comp-lzo

verb 3

remote 117.176.159.163 1194 :this is openvpn server ip

upload all certificate file and client.ovpn

The screenshot shows a web management interface with a blue header bar containing the text "WE FOCUS.WE DELIVER". Below the header is a navigation menu with tabs: "Basic", "Service Port", "Advanced", "VPN" (highlighted in orange), "Web Filter", and "Firewall". On the left side, there is a sidebar menu with options: "System", "Network" (selected), "Line", "Phone settings", "Phonebook", "Call logs", and "Function Key". The main content area is titled "OpenVPN" and features a toggle switch that is currently turned on. Below the toggle is an "Apply" button. A red-bordered box highlights the "OpenVPN Files" section, which contains a table with four rows of file information. Each row has an "Upload" button and a "Delete" button.

OpenVPN Files			
OpenVPN Configuration file:	client.ovpn	N/A	<button>Upload</button> <button>Delete</button>
CA Root Certification:	ca.crt	N/A	<button>Upload</button> <button>Delete</button>
Client Certification:	client.crt	N/A	<button>Upload</button> <button>Delete</button>
Client Key:	client.key	N/A	<button>Upload</button> <button>Delete</button>

upload your file at there one by one .

then enable vpn ,and it is okey .
